---

### **Pregnancy and Childbirth in Ehlers-Danlos Syndrome – 2<sup>nd</sup> Edition**

This 32-page A5 booklet will be of immense value for medical and caring professionals as well as people with EDS. The main chapters are: - Introduction; Human Aspects of Pregnancy in EDS; Medical Aspects of Pregnancy in EDS; Physiological and Pathophysiological Changes in Pregnancy; Delivery in EDS; Post Partum Period; The Foetus and Newborn Child; and Conclusion. The subheadings cover a wide variety of subjects in an endeavour to answer all the queries likely to arise in a family thinking about pregnancy.

**ISBN 0 9525986 6 3**

**Price including p&p: - UK £2.00, Europe £2.50, Rest of World £4.00 airmail**

## Ehlers-Danlos Syndrome - A Guide for Teachers – 2<sup>nd</sup> Edition

The 'Guide for Teachers' booklet gives a valuable insight into EDS for teachers who have pupils with EDS, as well as giving suggestions for coping with day-to-day management and medical emergencies. It is suitable for use by Youth Leaders and others working with children and gives appropriate advice whether for tots or teens.

ISBN 0 9525986 8 X

Price including p&p: - UK £1.50, Europe £2.00, Rest of World £3.50 airmail

---

## Difficulties in School/College for Young People with EDS

The results of a survey conducted by a retired Head teacher and the members of the Ehlers-Danlos Support Group with recommendations made by a Physiotherapist, Occupational Therapist and the Head teacher.

Price including p&p: - UK £1.50, Europe £2.00, Rest of World £3.50 airmail

---

## Learning to be Different

This is a booklet especially written, by one of our members, for young children ages 4-7 years old. It is a combination of a storybook and a colouring book and tells the story of a little girl with EDS who is starting school. In the story, on one visit to the hospital, she meets Michael who also has EDS and enjoys talking to him about their various symptoms.

ISBN 0 9525986 3 9

Price including p&p: - UK £1.50, Europe £2.00, Rest of World £3.50 airmail

---

## So You have EDS too

An illustrated booklet written specifically for children, aged 8-13 years old, who have Ehlers-Danlos Syndrome. Topics include: So, what is EDS? How did I get EDS? What are the doctors looking for? Will I get better? What happens if I need to go into hospital? What do I tell my friends? Why don't any of my friends have EDS?

Price including p&p: - UK £1.50, Europe £2.00, Rest of World £3.50 airmail

## Key-facts Medical Card

### EHLER S-D ANLOS SUPPORT GR OUP UK

The bearer of this card is affected by the hereditary disorder of connective tissue known as Ehlers Danlos Syndrome. The defect gives rise to weakness of the major body structural protein, collagen, resulting in a loss of strength of many structures including the skin, bone, joint and blood vessels which become more fragile and thus more easily damaged or broken thus -

1. The skin is extra stretchy and may break, bruise easily and heal less well with thin and wide scars.
2. Joints are lax (double jointed), dislocate very easily and may develop osteoarthritis in later life.
3. Bones may fracture more easily.
4. Mitral valve prolapse may be present
5. In one form of the disease (EDS M) major arteries may rupture leading to serious haemorrhage.

Warning to health professionals attending the bearer of this card.

1. Handle this patient with great care as bruising and joint dislocation are very easily provoked.
2. Surgical sutures cut through fragile tissues so -
  - (a) Avoid surgery wherever possible.
  - (b) Sutures should be retained for twice the normal period.
  - (c) Use steristrips as an alternative to sutures where possible.
  - (d) For EDS types other than Type IV, providing complete haemostasis is achieved and careful and accurate skin suturing is accomplished no problems arise.
3. In pregnancy there is increased risk of premature rupture of the membranes and of APH and PPH.
4. Anaesthetists should be careful to avoid dislocation of the jaw during intubation.

A small plastic card which gives details of Ehlers-Danlos Syndrome on one side and, on the other, advice to health professionals attending the bearer of the card. One card is suitable for Vascular Type (Type IV) and another for all other types. There is room for an emergency telephone number on both cards. General cards, as above, are available in Italian (I), French (F), Dutch (D), German (G), Swedish (S), Norwegian (N), Russian (R), Turkish (T), Danish (DA), Spanish (SP), Portuguese (P), Greek (GR), Polish (PO), Chinese (C), Finnish (FI). Please state letter code if ordering a foreign card.

(The information on this card is only general and should not in any way replace the individualised medical recommendations of the patient's own specialists. Always use the foreign card in conjunction with the English card, as we cannot guarantee the exact accuracy of the translation.) Price including p&p: - UK £1.50, Europe £2.00, Rest of World £3.50 airmail.
